

Symbol

ISO 4401-03-02-0-05

Ports P, A, B, T - max. \varnothing 7.5 mm (0.29 in)

Technical Features

- › Mounting interface acc. to ISO 4401, DIN 24340 (CETOP 03) for use in vertical stacking assemblies
- › Set flow rate independent of load pressure and temperature changes
- › Meter-in, meter-out or bleed-off flow control
- › Integrated reverse flow check valve
- › Adjusted flow rate depends on the orifice area and adjusted differential pressure
- › Wide range of flow rate options
- › Quiet and modulated response to load changes
- › Adjustable by metallic hand screw
- › Fine low-torque adjustment
- › In the standard version, the sandwich plate of valve is phosphated for basic surface corrosion protection and as preparation for painting. Steel parts are zinc-coated for corrosion protection 240 h in NSS acc. to ISO 9227.
- › Enhanced surface protection for mobile applications is available. The sandwich plate and steel parts are zinc-coated with corrosion protection 520 h in NSS

Functional Description

Pressure compensated flow control valves are designed to provide adjustable controlled flow rates independently of changes in inlet and/or outlet pressure. 2-Way valves are used in meter-in, meter-out or bleed-off applications or in parallel arrangement.

The flow control valve consists of a housing, a throttling spool, an internal spring, the pressure compensator and a hand screw for adjustment.

Flow control valve VSS1-206-A

Provides regulated flow from the pump inlet to the consumer. Version A* is delivered without reverse free flow check valve. The version is available as a vertical stack close-off valve or as a sandwich plate.

Flow control valve VSS1-206-B

This valve functions on the same principle as the previous one, however, reverse free flow from port A2 to port A1 is provided by the built-in check valve.

Flow control valve VSS1-206-C

This valve functions as the valve described above, the only difference being the changed flow direction. The flow is controlled in the direction of A2 to A1 and free flow in the direction A1 to A2.

Technical Data

Valve size		06 (D03)		
Max. flow	l/min (GPM)	22 (5.8)		
Max. operating pressure	bar (PSI)	320 (4640)		
Nominal flow rates	l/min (GPM)	6.3 (1.7)	12 (3.2)	22 (5.8)
Min. flow rates	cm ³ (inch ³)/min	60 (3.7)		
Fluid temperature range (NBR)	°C (°F)	-30 ... +100 (-22 ... +212)		
Fluid temperature range (FPM)	°C (°F)	-20 ... +120 (-4 ... +248)		
Maximum degree of fluid contamination	for $Q \leq (1 \text{ l/min})$ for $Q > (1 \text{ l/min})$	Class 20/17/14 according to ISO 4406 Class 21/18/15 according to ISO 4406		
Max. flow rate variation at pressure change (for $Q > 2.5 Q_{min}$ and $p = 6...100\% p_{max}$)	%	± 5		
Weight	kg (lbs)	0.8 (1.76)
